

08. PROPORTIONALITY

ACTIVITY 1. THE HISTORY OF THE UNIVERSE IN 365 DAYS

We can use proportionality to shift some values into others to get an image of its measure.

For instance, we are going to convert the history of the Universe into a year. That is proportionally.

In this way the beginning of the Universe would be on January 1 at 0 am, and now would be on December 31 at 12 pm.

So we have to work out what day is equivalent to these:

1. The beginning of our Universe (Big Bang) was 15 000 millions years ago.

2. The Solar System formation was 5000 million years ago.

3. The first living being appeared 3000 million years ago.

4. The first dinosaurs were 300 million years ago.

For these last events you have to calculate the hour, minutes and seconds:

5. The first homo sapiens was 200 thousand years ago.

6. Christ came to Earth 2 thousand years ago.

JANUARY							FEBRUARY							MARCH						
1	2	3	4	5	6	7				1	2	3	4				1	2	3
